

## Description

37 KW high-pressure washer series, which working pressure varies from 500 bar to 1000 bar , can remove the stubborn dirt on the surface of device, machinery parts, and interior of pipes efficiently and effectively. It is the best solution for cleaning without any damage to the cleaning object.

Excellent Performance

Stability

Excellent Performance

Labor Saving

## Technical Specifications

Model	FS38/50E	FS30/60E	FS25/80E	FS20/100E
Supply Voltage V/Hz	3/380/50	3/380/50	3/380/50	3/380/50
Maximum working pressure (bar/Mpa)	500/50	600/60	800/80	1000/100
Max. flow rate L/min	38	30	25	20
Connection load (KW)	37	37	37	37
Electric Motor Speed (RPM)	1000	1000	1000	1000
Machine Weight (Kg)	680	680	680	680
Dimensions (L*W*H) mm	1550*1380*1350	1550*1380*1350	1550*1380*1350	1550*1380*1350

## Equipment

6-poles low speed industrial electric motor	■
Intelligent electronic control box (cushioned start)	■
Stainless steel high-pressure pump	■
Patented coupler	■
Stainless steel bag filter	■
High-density inlet water filter	■
High-capacity stainless steel water tank	■
Vertical pressure booster pump	■
Safety device	■
Heavy-duty welded steel frame	■
Heavy-duty pneumatic tires	■
Spray gun	■
20 meters industrial-grade high pressure resistant hose	■
Single-hole nozzle	■

## General Applications

- Automobile factory equipment cleaning
- Chemical reactors and storage tank cleaning
- Heat exchanger and condenser cleaning
- Concrete restoration
- Steel surface phosphorus removal in metallurgical industry
- Paper manufacturing factory equipment cleaning
- Hull surface paint and rust cleaning
- 
-
